Business Pitch

Subject: Application for Junior React/Next.js Developer Role

Hi Sir,

I'm excited to apply for the React/Next.js Developer position at your Company. As a recent graduate with hands-on experience building modern web applications, I'm eager to leverage my skills in TypeScript, Next.js, and Sanity CMS to contribute to your team's success.

While I'm new to the professional scene, my personal projects reflect my ability to deliver results:

- Developed a Sanity CMS-powered blog with Next.js and Tailwind CSS, showcasing seamless content updates.

- Built a responsive e-commerce template with dynamic product listings using GROQ queries.

- Prioritized clean code and user-centric design in all projects.

What I lack in experience, I make up for with curiosity, adaptability, and a strong grasp of your tech stack. I'm particularly drawn to Company focus on specific company value or project, and I'd love to help enhance your digital products with scalable frontend solutions.

I'd welcome the opportunity to discuss how my technical foundation and passion for learning can add value to your team. Thank you for considering my application. I'm available for an interview at your convenience.

Best regards,
Zohaib Alam
